Muhammad Hussnain

+92 332 66 34261 | codewithhussnain1@gmail.com | github.com/HNCodes-journey | Islamabad, Pakistan

PROFILE

Computer Science student at SZABIST University, Islamabad, pursuing an Applied AI/ML engineering path. Hands-on with Python, NumPy, pandas, Matplotlib, data cleaning, exploratory data analysis, and core machine-learning concepts including supervised/unsupervised learning and model evaluation. Strong foundation in data structures, object-oriented programming, Git/GitHub, and software development, with additional experience building applications backed by PostgreSQL and deploying a Java web application on AWS EC2. Seeking a Machine Learning Engineer Internship where I can contribute to experiments, data workflows, model evaluation, and ML-powered product features.

EDUCATION

Bachelor of Science in Computer Science 2023 – Present

SZABIST University, Islamabad — 6th Semester Done | CGPA: 3.25 / 4.00

Relevant Coursework: Python | Artificial Intelligence | Data Structures & Algorithms | OOP | Software Engineering

EXPERIENCE

AI/ML Intern — Dexterz Technologies (Pvt.) Ltd. Jul 2026 – Sep 2026

CERTIFICATIONS

Google AI Essentials — Coursera (Google Career Certificates): Specialization, 5 courses — completed Jul 18, 2026

- Courses: Introduction to AI · Maximize Productivity With AI Tools · Discover the Art of Prompting · Use AI Responsibly · Stay Ahead of the AI Curve

Verify: coursera.org/verify/specialization/WW3MUYU7I8UK

TECHNICAL SKILLS

Programming: Python, C++, Java, JavaScript

Data & ML: NumPy, pandas, Matplotlib; ML fundamentals, data cleaning, EDA, model evaluation

Statistics: Descriptive Statistics, Measures of Central Tendency and Dispersion, Quartiles, Interquartile Range (IQR), Basic Outlier Detection

Machine Learning Fundamentals: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Dimensionality Reduction, Anomaly Detection, Association Rule Learning

Core: Object-Oriented Programming, Data Structures & Algorithms, problem solving

Databases & Cloud: PostgreSQL, JPA, AWS EC2, Apache Tomcat

Tools: Git, GitHub, Visual Studio Code, IntelliJ IDEA

MACHINE LEARNING FOUNDATIONS

Machine Learning foundations: supervised and unsupervised learning, KNN, K-means, neural-network concepts, and model evaluation. Currently building stronger practical ML skills alongside Python data analysis.

PROJECTS

E-Commerce Sales Analytics *Python | pandas | NumPy | Matplotlib*

- Analyzed e-commerce sales data to identify trends in revenue, orders, and product performance.
- Performed data cleaning, aggregation, exploratory analysis, and business-metric analysis using pandas and NumPy.
- Built Matplotlib visualizations to communicate findings and support data-driven conclusions.
- GitHub: github.com/HNCodes-journey/E-Commerce-Sales-Analytics

Marks Analyzer *Python | NumPy | pandas | Matplotlib*

- Built a data-analysis tool to process and summarize student marks datasets.
- Applied cleaning, aggregation, exploratory analysis, and statistical summaries to structured data.

- Created visualizations for grade distributions and performance trends.

FinTrack — Finance Tracking Web Application *Java | JPA | PostgreSQL | AWS EC2 | Apache Tomcat*

- Developed a full-stack web application using Java Servlets and JPA with PostgreSQL persistence.
- Deployed the application on AWS EC2 and configured Apache Tomcat 10 and an Apache reverse proxy.

Hospital Patient Management System *Python | Queue | OOP*

- Developed a console-based patient management system using a Queue to manage patient flow.
- Applied OOP principles to organize the application and its data-handling logic.

ADDITIONAL

Soft Skills: Problem Solving | Team Collaboration | Communication | Quick Learner

Languages: English — Native | Urdu — Fluent
